Mercedes-Benz

Our Mercedes-Benz Paint Protection System is an advanced paint-protection technology that works perfectly with Mercedes-Benz paint. This gives the paintwork optimum protection and reduces the level of dust, insect, bird droppings and road grime adhesion. Most importantly, our paint-protection system makes it effortless to wash and remove stubborn dirt stains, therefore saving you time and effort in maintaining your car's Nano paintwork.

Application process

Step 1: Thorough washing

All impurities on the surface of the car will be removed.

Step 2: Polishing

Trained technicians at Mercedes-Benz Authorised Service Centers will clean your Mercedes-Benz thoroughly, and polish it to minimise the appearance of any hairline scratch marks.

Step 3: Application of Mercedes-Benz Paint Protection System

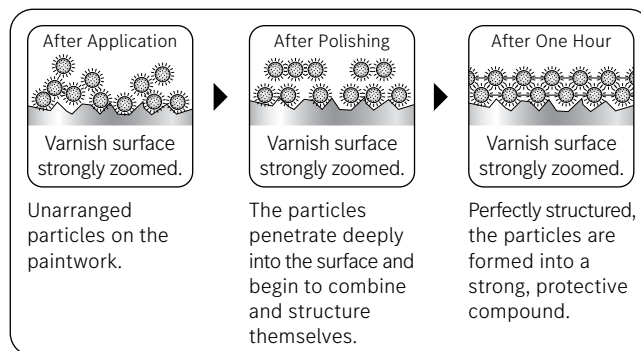

At this stage, the microscopic gaps on the paint surface will be filled. This process penetrates the paintwork, forming an inorganic silicate protective layer on the car that provides hardness and durability.

Step 4: Quality check

Our Mercedes-Benz certified technicians will conduct a thorough check to ensure that the coating is evenly applied. Once the inspection has been completed, your car will be marked with a sticker which reminds you to return a year after the date of application for a follow up inspection.

Benefits

- Works perfectly with genuine Mercedes-Benz Nano Paint work
- The super-transparent sealant enhances the paint's colour brilliance
- Provides optimum protection for vehicle paint
- Short hardening time of just one hour
Other technology requires up to 24 hours
- Complements the scratch-resistant Mercedes-Benz Nano Paint and enhances its durability
- Prevents oxidation of paintwork and improves chemical and mechanical resistance

Mercedes-Benz Paint Protection System Package
