Importance of Air-conditioning Maintenance

Continuous re-circulation of the air inside the cabin, cigarette smoke and dust, combined with high humidity causes foreign particles and bacteria to accumulate on the evaporator. Over time, this results in unpleasant smells inside your car. For a fresher, cleaner feel, service your car's air-conditioning system on a regular basis. The following are some of the other benefits:

- Reduced particle and bacteria ingress within the vehicle.
- Improved efficiency for the air-conditioning system.
- Deodorising of air-conditioning system.
- Improved fuel efficiency.

Three Essential Steps

Air-Conditioning Chemical Wash consists of three essential steps to maintain your vehicle's air-conditioning system.

1. Diagnosis

At Cycle & Carriage, we diagnose the air-conditioning system using advanced diagnostic system, XENTRY Solutions which provides a fast and reliable diagnosis of vehicle issues.

At Mercedes-Benz Authorised Service Centers, we have the proper know-how to correctly adjust your air-conditioning software settings.

2. Two-stage Chemical Wash Process

- Cleaning of coil — using a special Mercedes-Benz chemical disinfectant to remove foreign particles and bacteria.

- An ultrasonic atomiser is used to freshen up the air inside the cabin and remove unpleasant odours.

3. Quality Check

Final quality checks to ensure that gas is topped up to factory standards to obtain maximum efficiency. Maintain your car to the standards set by our factory and service the air-conditioning system regularly to enjoy a comfortable ride for you and your family.

User Information

- **Recommendation:** Air-conditioning system should be serviced every 30,000 km or 1 year, whichever comes first.
- It is highly advisable to change the air-conditioning filter on top of purchasing the Air-Conditioning Chemical Wash.
- A clean air-conditioning system will promote good hygiene and prevent the spread of air-borne diseases.
- Other works done on separate order, if necessary, would be charged accordingly.
